GB8M-10-LD-U-W Shown

NEW Industry Leading Features

- ✓ **Slanted Mix Chamber** - Provides optimal mixing of cappuccino; keeps product flowing away from motor seal.
- ✓ **Extra Large Merchandising Area** - Large backlit front door graphic.
- ✓ **F.A.S.T. Service** - All major components are accessible through the front of the dispenser.
- ✓ **Easy Access To Bulbs**
- ✓ **Plus Other Standard Cecilware Features!**
- ✓ **OPTIONAL Side Panel Graphics** - Graphics on three sides grab attention to increase sales.

F.A.S.T. Service

Front Access Saves Time - Exclusively designed by Cecilware, allows access to major components through the front of the dispenser.

- Save money on service calls.
- Maximizes operating time.

GB5M-10-LD-U Shown

Dispenses **30% faster**, reduces and wear and tear on major components.

- **Vertical Lift Front Door** – Hinged on the top, gives complete access to hoppers & components.
- **Vacuum Steam Removal System (VSRS)** – Ensures the powdered mix remains dry to eliminate clogging, caking and bridging.
- **Removable Moisture & Powder Collection Tray** – Catches excess moisture and cappuccino powder before it reaches the vacuum motor. Keeps the dispenser in top working condition.
- **Direct Drive Auger System** – Insures perfect hopper alignment and “silent running.”
- **“Power Whip”** – Carefully whips the Cappuccino into a delicious, creamy drink.
- **Uniquely Designed Water Tank** – Maintains perfect temperature readiness at all times.
- **Flexible Dispensing** – Capable of handling 8½” cups.
- **No Splash Drip Tray** – Helps prevent hot cappuccino from splashing onto the back wall keeping your dispenser clean.
- **Quick Change Transparency** – Simply lift up 2 tabs and pull out the graphic. Also gives you instant access to light bulbs and starters.
- **Self Cleaning Feature** – Rinse system is touch button easy and rinses the entire whipper chamber with hot water at the end of each cycle. All parts requiring cleaning can be removed by hand.

Optional

- **Automatic Portion Control** - Allows an operator to dispense Cappuccino into a predetermined size cup.
- **SMARTSENSE Density Sensors** - Monitors cappuccino powder level, alerts operator when product hopper needs to be refilled, shuts off dispense mechanism on empty flavor hopper, and re-engages when hopper is refilled.
- **Hot Water Dispense Button** - Allows an operator to offer soup, tea or hot oatmeal.
- **Side Panel Graphics Package** - Beautiful color graphics attract attention from all sides of the dispenser.
